Face Technology: ELEMIS

ELEMIS BIOTEC Technology

BIOTEC facial treatments are where ground-breaking technology meets active ingredients and transformative touch. The pioneering innovation of the BIOTEC machine works to switch the skin back on, increasing its natural cellular energy. Technology turbo-charges touch. The clinically proven result? Thriving, visibly healthy and energised skin. Choose from the following ELEMIS BIOTEC treatments...

(All treatments)

55 mins **£85.00**

BIOTEC Line Eraser *(If your concerns are lines and wrinkles)*

Wrinkles are targeted with firming and toning micro-current pulses to stimulate the skin cells towards dynamic functionality. Circulation is improved, increasing the production of collagen and elastin, whilst the dermis is flooded with super-hyaluronic hydrating activators. Red and blue light therapy warms and de-stresses the skin whilst a blast of oxygen delivers a breath of fresh air, effectively ironing out wrinkles and filling in lines. A powerfully rejuvenating facial treatment.

BIOTEC Firm-a-Lift *(If your concerns are sagging jowls and jawlines)*

Rediscover the architecture of your face with this ground-breaking blend of massage and sculpting technology. Circulation stimulating stem cells and Alaria Esculenta seaweed are activated by micro-current pulses to tighten slackening skin. Galvanic currents infuse the skin with bio-active formulas that hydrate and tone. The extra-cellular matrix of the skin is visibly strengthened, restoring elasticity and tenacity for a contoured complexion that is remarkably lifted.

BIOTEC Skin Resurfacer *(If your concerns are uneven skin tone)*

This revolutionary resurfacing facial addresses skin tone, blemishes and fine lines to transform the texture of the skin. The ultrasonic peel reveals a noticeably smoother complexion. Skin is deeply cleansed and detoxified before massage and light therapy restores equilibrium. Wrinkles and fine lines are reduced to leave a complexion that has never been softer or smoother.

(Not suitable in conjunction with the use of heat facilities such as sauna, steam room and hot tub or facial waxing.)

BIOTEC Radiance Renew *(If your concerns are to brighten dull skin)*

A powerful antidote for dull and tired skin, this cellular-boosting treatment targets sluggish complexions. The ultrasonic peel pumps vibrational energy into the skin to exfoliate and stimulate the removal of impurities and dead skin cells, while the Galvanic rejuvenating current harnesses the power of Elderberry & Orange flower extracts to restore moisture and vitality. Skin is left profoundly reinvigorated. Instantly clearer, visibly brighter and radiant.

BIOTEC Blemish Control *(If your concerns are congested or hormonal skin)*

A deep cleansing facial that detoxifies the skin and repairs damaged tissue. This treatment uses ultrasonic vibration, massage, steam and galvanic currents to thoroughly decongest and exfoliate. A powerfully anti-oxidant, anti-bacterial activator containing Salicylic Acid and inflammation-reducing Iris soothes and smoothes while light therapy helps balance and clear the complexion, speeding up recovery.

Face Technology: CACI

CACI Face Technology

The CACI treatment system can deal with a myriad of concerns from acne, congested pores and blemishes to sagging jawlines. Take free advice from our CACI specialists for your personalised solution. *Learn more about CACI treatments below...*

Microcurrent

Originally developed for treating facial palsy, microcurrent is used to re-educate the facial muscles. Due to its dramatic lifting and toning effects the CACI microcurrent facial has become known as the 'non-surgical face lift'. For best results a course of 10 treatments is recommended.

CACI Jowl

Targeting the jowl area, this microcurrent treatment uses quad probe applicators to double the lifting action of the muscles to firm and tone.

Microdermabrasion

A procedure using disposable abrasive tips to give controlled exfoliation of the dead outermost surface of the skin, this light abrasion reveals a softer, more youthful complexion.

*Sunlight and sunbed use should be avoided for five days and a SPF of 30 or above is advised during this time.
Not suitable if you are using sauna/steam hot tub or receiving facial waxing 12 hours before and after.*

CACI Ultrasonic Skin Peeling (Ultra Facial)

Provides a gentler alternative to microdermabrasion using ultrasonic vibrations which propel impurities to the surface of the skin and causes skin cells to become dislodged. A good choice for those with an acne skin or concerns with blackheads. Your CACI therapist can perform controlled extractions to help visibly clear and brighten skin.

Sunlight and sunbed use should be avoided for five days and a SPF of 30 or above is advised during this time.

Light Therapy

Numerous scientific studies have shown the effect of light therapy. The system has the option of red or blue photo stimulations; blue light will give an antibacterial and calming effect, perfect for treating an acne or blemished skin, whilst the red light works to treat lines and wrinkles.

CACI Hydratone

Combines active microcurrent rollers with a unique Hydratone mask, rich in skin quenching ingredients; rose water, collagen and hyaluronic acid. The gel mask has a dramatic softening action to smooth lines and wrinkles and provides immediate and intense skin hydration and firming to the face, neck and décolleté.
